Surfacemount profile for LED strip, 2,35 m, Matt anodized, Aluminium

5085062

Product Information

The surface profile is an essential accessory in the installation of the LED light strips which will be fixed and protected, turning the strips into surface lamps for multiple uses in any space. Its measure is 2.35 m long and has 18mm wide by 10.7mm tall. This profile is made of aluminum with a matt anodized finish. For its installation, the profile is fixed by means of three screws that go through the aluminum plate, then the electrical power cable is placed that will connect with the strip, finally, the strip is glued to the profile and closed with a ceiling where the light will pass of the LED strip. Its packaging contains 20 units of profiles.

SKU	5085062
EAN	8432393136769
