## Frequently asked questions

---

What is the minimum depth of the cabinet required to install it correctly?

---

A minimum depth of 450 mm is recommended, allowing the accessory to be fully extracted without interference or blockage from the rear of the enclosure.

What is the finish of the aluminium belt holder and what advantages does it offer?

---

The aluminium is treated with a matt anodised finish, which provides a soft touch, greater durability and a modern aesthetic in keeping with high-end furniture.

Can this accessory be combined with the rest of the Self range in the same module?

---

Yes, it is fully compatible with other Self accessories such as the trouser rack, mirror or pull-out hanger. They all have the same design line and standard depth for joint use.
