

**Activator for Ultrabox Soft Close slide, White plastic, Plastic**

4005715

**Product Information**

SKU	4005715
Materials	Plastic
Finishings	White plastic
Packaging	200 Ut

The Ultrabox Soft Close Drawer Actuator is a small piece that sits on the bottom of the drawer. It has two teeth on each side and a flange on the other and is fixed by means of two screws. Its main function is, together with the slides, to make the Ultrabox drawer close smoothly, so if this feature is desired it is necessary to have an actuator. It is made of white plastic, a material resistant to continuous use, and it is also recommended to place it on both sides of the drawer for better operation.
