Kaus USB rechargeable LED light with motion sensor, L600mm, Plastic and Aluminium, Matt anodised
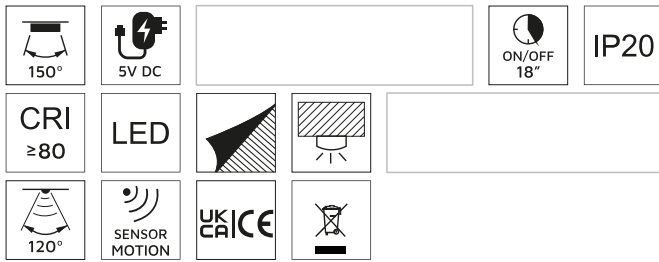

5213662

Product features

- LED luminaire that allows kitchen and cabinet lighting without the need for cables, with an elegant extra slim design and a length of 600 mm.
- It has an integrated twilight motion sensor that turns on the luminaire when it detects movement of people in its detection range (2 m long and 120º angle) and turns off automatically when it stops detecting movement, after 18 seconds.
- The twilight sensor makes the luminaire activate when the ambient light is below 250Lux, which allows to extend the life of the battery since it only turns on when it is really necessary.
- It has a rechargeable 850mAh lithium polymer battery with a 400 power-on cycle life of 18 seconds, plus a manual on/off switch.
- The battery can be recharged with a conventional 5V DC 1A cell phone charger (not included) and a 30 cm type C micro USB cable (included), in less than 2 hours (LED charge status indicator).
- It is very easy to attach, just stick some adhesive metal bases on the furniture and the luminaire adheres magnetically, so it can be easily removed for recharging.
- It includes the screws and the adhesive tape needed for assembly.
- Low consumption LED technology.
- Light flow of 180 lumens.
- Power 3 W.
- Variable white colour temperature 3.000 - 4.000 - 6.000 Kelvin. Can be adjusted by pressing the side button or by waving your hand over the sensor twice in succession.
- 150º light beam.
- Light suitable for dry areas, IP 20.
- It is made of aluminum and plastic with a matte anodized finish.

- Light suitable for dry areas, IP 20.
- It is made of aluminum and plastic with a matte anodized finish.

Product Information

150°	5V DC			ON/OFF 18"	IP20
CRI ≥80	LED				
120°	SENSOR MOTION	UK CA CE			

The **Kaus LED light fixture** is designed as a cordless kitchen and cabinet light, with an elegant extra-slim aluminum design. With this LED light you can illuminate the interior of your cabinets, the kitchen countertop or the passage areas of your home, with a **warm, natural or cold white color**, as it allows you to vary the color temperature. It is also a **dimmable** luminaire with which you can increase or decrease the luminous flux.

It has an **integrated twilight motion sensor** that turns on the luminaire when it detects movement of people in its detection range (2 meters in length and an angle of 120º) and turns off automatically when it stops detecting movement, after 18 seconds. It also has a switch to manually turn the luminaire on or off.

This luminaire has a **rechargeable lithium polymer battery** of 850mAh with an autonomy of 400 power cycles of 18 seconds before the battery runs out. It is recommended to recharge the luminaire with a **conventional 5V DC 1A cell phone charger** (not included) and a 30 cm type C micro USB cable (included). Estimated full charge time is less than 2 hours, but varies depending on luminaire size and charger amperage. To check the charging status, it has an LED indicator that turns from red to green when charging is complete.

Its **installation is very easy and simple**, you just have to stick some adhesive metal bases on the surface of the furniture, without the need for cables or holes. The magnets incorporated in its interior allow it to adhere to the plates magnetically, and in this way the luminaire can be easily removed for recharging.

SKU	5213662
EAN	8432393290386
Materials	Plastic, Aluminium
Finishings	Matt anodized
Packaging	1 Unit
L	600
Lumen	180 lm
Power	3 W
Color temperature	3.000 K - 4.000 K - 6.000 K
Components	1 rechargeable LED light

Components

1 rechargeable LED light
