The Folding Concepta hardware set is a system for folding wooden doors that gives the possibility of being installed between walls or on modules allowing to hide spaces such as kitchen, office, laundry area, dressing room, maintaining the aesthetics of the environment. This system, being open, offers the comfort of having a completely accessible space, even without having lower rails. Resists doors up to 25kg, from about 19 to 26mm thick. It has a rolling and guided system with bearings. It can be mounted on both the left and right sides, plus it includes the hardware needed for two folding sliding doors and comes in a matte silver anodized finish.
